

SCHOOL PROGRAMS TO LEARN ABOUT THE TRADES

Higher Income, Lower Debt

\$90,000 average salary one year after completing a debt-free apprenticeship.

Earn A Paycheck Early

Students earn a regular paycheck during an apprenticeship.

Earn College Credit

Apprenticeships in Michigan earn credits, transferable to 2-year colleges in the UP

High Workforce Demand

Jobs in the skilled trades are in high demand.

Spark curiosity, confidence, and career exploration

We can help students learn about great opportunities for their futures that don't require the debt or cost of a college degree. Skilled trades are in high demand and only increasing in the next decade.

With the right experiences, students can step into active, engaging roles, such as plumber, electrician, equipment operator, project estimator, instructor, coordinator, and start imagining themselves in the world of work before they make any big decisions.

BUILDING TOGETHER *trades & education*

UPCC can provide the following learning experiences:

- ✓ Classroom presentations about trades
- ✓ Coordinate field trips to local trades training centers
- ✓ Provide information about UPCC programs for high school students
- ✓ Virtual Reality classroom experiences (Available Spring 2027)

Visit upconstruction.com to learn more about the UPCC, request a learning experience, learn about UPCC programs, and more about apprenticeship programs with local unions.

UPCC Programs *For High School Students*

Building Trades Summer Camp

Multi-week summer day camp. Students learn a variety of skills and are paid for four hours of work each day.

Construction Connect

Seniors enrolled in a CTE program may be placed with a local contractor and spend two hours per day working on a local site, being paid for their time. Students completing the program are directly placed into a local apprentice program upon completion.
